Team ID	SWTID-2026-1806
Project Title	Personalized Networking Assistant
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) Report

This proposal aims to help professionals manage their networks more meaningfully using generative AI — remembering context about each relationship and proactively surfacing personalized ways to stay in touch.

Project Overview

Field	Details
Objective	Help professionals build and maintain meaningful relationships by using GenAI to remember context, personalize outreach, and prompt timely follow-ups.
Scope	A web application that connects to a user's email/LinkedIn, stores relationship context, and uses an LLM to generate personalized messages, meeting-prep briefs, and follow-up reminders.

Problem Statement

Field	Details
Description	Professionals meet many contacts but lack a low-effort way to retain context, leading to forgotten relationships and impersonal, infrequent outreach.
Impact	Missed opportunities for career growth, sales, and collaboration; relationships fade despite genuine early interest on both sides.

Proposed Solution

Field	Details
Approach	Combine a structured contact/notes store with an LLM that generates personalized drafts grounded in the user's own notes and interaction history (RAG-style retrieval).
Key Features	- AI-drafted, context-aware follow-up messages - Relationship health scoring and smart reminders - Meeting-prep briefs summarizing contact history - One-click import from email/LinkedIn

Resource Requirements

Resource Type	Description	Specification / Allocation
Computing Resources	CPU/GPU specifications, number of cores	Standard cloud compute (no local GPU needed; inference via hosted LLM API)
Memory	RAM specifications	4-8 GB per service instance

Resource Type	Description	Specification / Allocation
Storage	Disk space for data, models, and logs	50-100 GB (scales with contact/notes volume)
Frameworks	Backend/Frontend frameworks	FastAPI, React
Libraries	Additional libraries	SQLAlchemy, Pydantic, LangChain/LLM SDK, pgvector client
Development Environment	IDE	VS Code
